

TITLE: Tails of Triumph

AUTHOR: Terri Steuben

It's been ten years since Hurricane Katrina devastated New Orleans, but the aftereffects can still be seen and felt throughout the area. Many of those aftereffects involve the animals whose lives were turned upside down by the storm.

In the wake of the disaster, animal communicator Terri Steuben helped a team from the HSUS locate and rescue displaced and stranded animals. She kept a journal of her experiences, now available as a book called *Tails of Triumph*, a moving testimony of courage and survival. There's the dog that roamed the streets for food and took mouthfuls back to a canine friend who couldn't leave their house. Or the cat that broke into a kitchen cupboard and survived on toaster pastries until being found. Or the guard dog who didn't want to leave his post, even though his home was destroyed.

This book is a riveting read, and one that will leave you with a new appreciation of the loyalty, love and strength that can arise in both people and animals following catastrophe.
